HALYARD

Introducing Class IIb

Preventing and controlling healthcare-associated infections (HAIs) in Australia

165,000 HAIs each year

~165,000 HAIs occur in health facilities each year, making them the most common complication affecting patients in hospital[1,2]

Negative impact of HAIs

HAIs can impact healthcare resources and cause great suffering for patients[2]

Precautions for HAIs

Standard and transmission-based precautions can stop and slow the spread of known or suspected HAIs[2]

2 million hospital bed days

HAIs account for ~2 million hospital bed days each year[3]

Clean with a QAC

Environmental cleaning & disinfection, a key element-based precaution, with a Quaternary Ammonium Compound (QAC) can stop the spread of HAIs[4,5]

HAIs are preventable

Most HAIs are preventable[2]

One Wipe to Clean 'n' Disinfect.

HALYARD* 2n1* WIPE

Kills a wide spectrum of pathogenic microorganisms common in hospitals and adjacent healthcare settings including:[6]

Bacteria

- *Klebsiella pneumonia* (CRE)
- *S. aureaus* (MRSA)
- *E. faecium* (VRE)

Viruses

- Covid-19
- Influenza A
- Norovirus

Yeast

1 MIN KILLS IN 1 MIN

- *Candida albicans*
- *Candida auris*

HELP WIPE AWAY THE RISK WITH HALYARD*^

^When used in accordance with the directions for use, using HALYARD* 2N1* Wipes reduces the risk of certain pathogens.

Make the switch to a one-step cleaning & disinfection with HALYARD* 2n1* WIPE

2 IN 1 CLEANS + DISINFECTS

Tested using EN 16615, a quantitative surface test method that simulates the practical use of disinfectant wipes on non-porous surfaces.

Our high-quality products meet or exceed industry standards.

- ✓ Effective and rapid removal of blood and bodily fluids from surfaces[7]
- ✓ Light fabric made from 100% polypropylene to facilitate bactericidal efficacy[8,9]
- ✓ Strong and durable wipe[10]
- ✓ Low linting[10]
- ✓ Fragrance free
- ✓ Suitable for hard surfaces

Microbial testing results[6]

PATHOGEN	CONTACT TIME	TEST
BACTERIA		
Staphylococcus aureus	60 seconds, 120 seconds	EN 13727, EN 16615
Staphylococcus aureus (MRSA)	60 seconds, 90 seconds	EN 13727, EN 16615
Pseudomonas aeruginosa	60 seconds, 90 seconds	EN 13727, EN 16615
Enterococcus hirae	60 seconds, 90 seconds	EN 13727, EN 16615
Escherichia coli	60 seconds, 90 seconds	EN 13727, EN 16615
Enterococcus faecalis (VRE)	60 seconds, 90 seconds	EN 13727, EN 16615
Salmonella choleraesuis	90 seconds	AOAC961.02
Klebsiella pneumoniae (CRE)	60 seconds, 90 seconds	EN 13727, EN 16615
VIRUSES		
Covid-19 (MHV-1)	30 seconds	ASTM E1053
Norovirus (FC surrogate)	60 seconds	ASTM E1053
Poliovirus	60 seconds	ASTM E1053
Herpes Simplex Virus	60 seconds	ASTM E1053
Influenza Type A (H1N1)	60 seconds	ASTM E1053
Adenovirus	60 seconds	ASTM E1053
Rotavirus	60 seconds	ASTM E1053
YEAST		
Candida albicans	60 seconds	EN13624, EN16615
Candida auris	60 seconds	EN 16615

Ordering Information

	HYH Code	PGC/CH2 Code	Size	Desciption	Packaging
	17001	2835132	28cm x 21cm	HALYARD* 2n1* Wipe Soft Pack 100	Eaches/Soft Pack = 100 Soft Pack/ Case = 12 Eaches/Case = 1200
